

This Journal of Environmental Horticulture article is reproduced with the consent of the Horticultural Research Institute (HRI – www.hriresearch.org), which was established in 1962 as the research and development affiliate of the American Nursery & Landscape Association (ANLA – <http://www.anla.org>).

HRI's Mission:

To direct, fund, promote and communicate horticultural research, which increases the quality and value of ornamental plants, improves the productivity and profitability of the nursery and landscape industry, and protects and enhances the environment.

The use of any trade name in this article does not imply an endorsement of the equipment, product or process named, nor any criticism of any similar products that are not mentioned.

ERRATUM

Effect of the Growth Regulator Proxy on Creeping Bentgrass Fairway Turf

John Stier, Zac Reicher, and Glenn Hardebeck

Volume 18(1):53–58

The rate of Primo (trinexapac ethyl) was incorrectly listed as 1.0 kg/ha (0.9 lb ai/A) when it should have been 0.1 kg ai/ha (0.09 ai/A).
