

This Journal of Environmental Horticulture article is reproduced with the consent of the Horticultural Research Institute (HRI – www.hriresearch.org), which was established in 1962 as the research and development affiliate of the American Nursery & Landscape Association (ANLA – <http://www.anla.org>).

HRI's Mission:

To direct, fund, promote and communicate horticultural research, which increases the quality and value of ornamental plants, improves the productivity and profitability of the nursery and landscape industry, and protects and enhances the environment.

The use of any trade name in this article does not imply an endorsement of the equipment, product or process named, nor any criticism of any similar products that are not mentioned.

Journal of Environmental Horticulture

Volume 2, Numbers 1-4

1984

Subject Index

Air Pollution		Chlorosis	
azalea and rhododendron/ozone effects on severity		seasonal variations of foliar nutrients in red maple	2:117
of <i>Phytophthora</i> root rot	2:12	Citrus	
Annuals		tolerance to pre-emergent herbicides	2:73
growth response to sewage sludge amended media	2:112	Composted Sewage Sludge	
Arborvitae		growth response of annuals	2:112
root regeneration	2:33	Container Culture	
Areca Palm		Bradford pear/effect of N rate and container	
effect of age and handling of seedlings on growth	2:91	size on growth	2:53
Attitudes		growth response to sewage sludge amended media	2:112
making gardening a way of life	2:46	media temperature as influenced by soil moisture level	2:12
Azalea		ponderosa pine/modification of root system in containers	2:21
influence of ozone on severity of <i>Phytophthora</i> root rot	2:12	Creosotebush	
		transplanting success from native stands	2:83
Bald Cypress		Disease & Disorders	
cypress twig gall midge/control of	2:38	azalea and Rhododendron/influence of ozone on	
Brown Garden Snail		severity of <i>Phytophthora</i> root rot	2:12
efficacy and phototoxicity of selected pesticides on	2:109	Douglas Fir	
		seed sources/effects on growth	2:93
Canyon Maple			
growth response to chilling treatments	2:128		

Economics	
insecticide/miticide use survey in Pennsylvania nurseries	2:16
Environment	
maple/response to chilling temperatures	2:128
Fertilizer	
Bradford pear/N concentration and container size on growth	2:53
foliage plants/effect of controlled release fertilizers	2:77
Helleri holly/timed fertilizer applications during propagation	2:43
Japanese black pine/slow release fertilizers on growth	2:9
maple/influence of trickle irrigation and N rate	2:40
seasonal variation of foliar nutrients in red maple	2:107
shade trees/fertilization practices	2:64
Foliage plants	
controlled release fertilizers on	2:77
Foliar Nutrients	
seasonal variations of in green and chlorotic red maples	2:107
Frazer fir	
rooting stem cuttings	2:23
Gardening attitudes	
a way of life	2:56
Growth	
areca palm/effect of age and handling	2:91
Bradford pear/N concentration and container size	2:53
Douglas fir/effect of seed source	2:93
maple/influence of trickle irrigation and N rates	2:40
maple/chilling treatments	2:128
photinia/pruning methods	2:81
Herbicides	
woody plants/efficacy and tolerance to Poast and Goal	2:120
Holly	
time fertilizer applications during propagation	2:43
Honeylocust	
wound compartmentalization in	2:123
Landscape specifications	
updating specifications	2:98
Landscape Gardening	
making plants a way of life	2:56
Landscape trees	
grass competition for nitrogen around	2:86
effect of pruning and staking	2:140
selection for wound compartmentalization	2:126
wound compartmentalization	2:123
Maple	
early selection for wound compartmentalization	2:126
growth response to chilling	2:128
influence of trickle irrigation and N fertilization	2:40
modeling transpiration from selected species	2:130
seasonal variation of foliar nutrients	2:117
wound compartmentalization	2:123, 126
Marketing	
making plants a way of life	2:56
Media	
annuals/response in composted sewage sludge amended media	2:12
Nematodes	
woody plants/impact of root lesion nematodes	2:136
Nutrition	
Bradford pear/N rates and container size on growth	2:53
Helleri holly/timed fertilizer applications during propagation	2:43
Japanese black pine/slow release fertilizer in containers	2:9
maple/N rates and trickle irrigation	2:40
seasonal variations of foliar nutrients in red maple	2:117
shade trees/fertilization	2:64
Oak	
selection for wound compartmentalization	2:126
Pear	
effects of N concentration and container size on growth	2:53
Pest Resistance	
brown garden snail/efficacy and phytotoxicity of pesticides	2:109
cypress twig gall midge/chemical control of	2:38
Pesticides	
brown garden snail/evaluation of control measures	2:109
cypress twig gall midge/chemical control	2:38
Pennsylvania nurseries/survey of insecticides & miticide use	2:16
Pests	
brown garden snail/control of	2:109
cypress twig gall midge/control of	2:38
Photinia	
effect of pruning methods on growth	2:81
Phytophthora	
influence of ozone on severity of	2:12
Pine	
Austrian pine/root regeneration in	2:33
mycorrhizae inoculation on root development	2:5
nutrition and performance in containers	2:9
root system modification in containers	2:1
Propagation	
Fraser fir/rooting stem cuttings	2:23
Helleri holly/fertilizer applications during propagation	2:43
rooting in gasifier residue media	2:88
southern wax myrtle/propagation by cuttings	2:45
Pruning	
effect on landscape trees	2:140
photinia/effects on growth	2:81
Quarantine Certification	
brown garden snail/control of	2:109
Root Regeneration	
arborvitae/root regeneration	2:33
Austrian pine/root regeneration in	2:33
Fraser fir/rooting stem cuttings	2:33
Seed Sources	
Douglas fir/effect on growth	2:93
Shade trees	
effect of pruning and staking	2:140
fertilization	2:64
Soil & Soil Amendments	
characterization of soil compaction at construction sites	2:48
media temperatures in containers as influenced by moisture content	2:21
soil amendments at planting	2:27
Southern wax myrtle	
propagation by stem cuttings	2:45
Staking	
effects of on landscape trees	2:140
Temperature	
media temperatures in containers as influenced by moisture content	2:21
Transpiration	
modeling from selected urban shade tree species	2:130
Transplanting	
creosotebush from nature stands	2:83
Weed Control	
citrus rootstocks/tolerance to preemergent herbicides	2:73
landscape plants/efficacy and tolerance to Poast and Goal	2:120
trees/effects of grass competition for N	2:86
Woody Plants	
cultivar registrations	2:102
effect of pruning and staking on	2:140
efficacy and tolerance to Poast & Goal on	2:120
grass competition around	2:86
impact of root lesions nematodes on	2:126
modeling transpiration in	2:130
plant selection in landscape specifications	2:98
response to soil compaction at construction sites	2:48
selection for sound compartmentalization	2:126
shade tree response to fertilization	2:64
Wounding	
honeylocust/compartmentalization in	2:123
maple/compartmentalization in	2:123, 126
