

This Journal of Environmental Horticulture article is reproduced with the consent of the Horticultural Research Institute (HRI – www.hriresearch.org), which was established in 1962 as the research and development affiliate of the American Nursery & Landscape Association (ANLA – <http://www.anla.org>).

HRI's Mission:

To direct, fund, promote and communicate horticultural research, which increases the quality and value of ornamental plants, improves the productivity and profitability of the nursery and landscape industry, and protects and enhances the environment.

The use of any trade name in this article does not imply an endorsement of the equipment, product or process named, nor any criticism of any similar products that are not mentioned.

Five Year Cumulative Subject Indices

Journal of Environmental Horticulture

Volumes 21–25: 2003–2007

- Abelia spp.** see Glossy abelia
effect of pruning on freeze damage 24:197
- Abies spp.** see Fir
- Acer spp.** see Maple
- Amur maackia**
N-fixation in 25:47
- Anthraco nose**
control in wintercreeper euonymus 25:21
- Arthropod pests**
monitoring of 22:5
- Artillery fungi**
effect of fungicides on *in-vitro* growth of 23:63
sporulation on 27 different mulches 22:117
use of mushroom compost to suppress 23:212
- Ash**
effect of Paclobutrazon on transplant success .. 22:209
- Aspen**
control of Poplar twig gall in 25:33
- Atlantic white cedar**
effect of controlled-release fertilizer on
growth of 23:97
- Auxin**
applications for propagation of woody plants ... 22:63
concentration effects on root regeneration 21:119
effect of foliar applications on rooting 21:131
effect on propagation of *Vinca minor* cuttings ... 23:1
enhanced application using thickening agents.. 25:126
use in cutting propagation 25:166
- Azalea**
weed control in 24:221
- Barberry**
evaluation as an invasive species 24:133
- Bedding plants**
fertilization of 21:99
height control with plant growth regulators ... 24:165
irrigation with recycled nursery runoff 21:89
- Beech**
polymer root dips to increase survivability
at transplanting 22:183
- Begonia**
effect of rootball condition on establishment .. 24:213
- Bentgrass**
control in bluegrass sod 22:213
- Bermudagrass turf**
suppression of growth with plant
growth regulation 21:162
- Betula spp.** see Birch
- Biological control**
effect on landscape plant establishment 23:108
effect on root survival 24:173
of black vine weevil 25:150
use of parasitoids to control columbine
leafminer 23:9
use to increase transplant success 22:197
- Birch**
polymer root dips to increase survivability
at transplanting 22:183
- Black-eyed susan**
chemical control of growth in 23:25
seed source effects production of 21:173
- Black spot**
control in rose 23:77
- Black vine weevil**
control with *Metarhizium* 25:150
- Blanket flower**
effect of salinity on growth 25:89
- Bluegrass**
control of bentgrass in 22:213
- Boxwood**
fertilizer requirements 22:50
pruning with Promalin 22:124
- Buckhorn**
propagation by seed and cuttings 23:86
- Buddleia spp.** see Butterfly bush
- Butterfly bush**

Turfgrass production		
effect of growth regulation on		
Bermudagrass growth	21:162	
Ulmus spp.	see Elm	
Vegetated roofs		
use of sedum on	24:95	
Viburnum		
overwinter survival	24:6	
Viburnum leaf beetle		
control with kaolin particle film	25:4	
Viburnum		
consequences of excessive irrigation	25:117	
container production of	25:61	
control of viburnum leaf beetle	25:4	
effect of freezing and salinity on		
cold hardiness	23:138	
Vinca		
chemical regulation of growth	23:14	
control of <i>Phytophthora</i> in	22:41	
propagation by single-node cuttings	23:1	
Virginia mallow		
propagation by stem cuttings	22:173	
Virginia sweetspire		
identification of cultivars using RAPD-PCR	21:6	
micro-propagation of	21:206	

Waste products	
use of cotton gin compost in	
growing substrate	23:133
Water conservation	
comparison of irrigation systems	22:217
using line source irrigation	24:225
Water monitoring	
in Pot-in-Pot production systems	23:47
Water reuse	
on herbaceous perennials	25:204
Water use efficiency	
influence of the nursery floor	22:100
Weed control	
during plug establishment	25:83
effect of fertilizer placement on prostrate	
spurge growth	21:177
in a pot-in-pot production system	23:204
in azalea	24:221
in bluegrass sod	22:213
in container production	22:93; 24:105, 129
in creeping phlox	21:24
in wildflower stands	21:68
of bittercress in containers	21:24
of common nursery weeds	22:106
of creeping woodsorrel	24:185
of liverworts in container grown crops	24:230
of northern willowherb in	
nursery containers	24:143
of oxalis in containers	22:45; 24:237
use of herbaceous perennials to	
suppress weeds	23:198
use of mulches	25:234
using slow-release herbicides for	21:1
Weed management	
effect on establishment of prairie grasses	23:101
in container production systems	24:105
Weigela	
N-uptake during container production	25:36
Wildflower	
propagation of lupine	21:64
tolerance to Imazapic	21:68
Wildflower establishment	
use of non-chemical weed control in	25:83
Willow	
effect of flooding on growth	22:155
Winter annuals	
fertilization in landscape beds	21:99
Zantedeschia spp.	see Calla lily
